# Jekri Preclaro Orlina

### Proudcloud Inc. / Mashup Ventures, Philippines — *Software Engineer*

OCTOBER 2016 - PRESENT

Specializing in functional programming as applied to Javascript and Elixir, I currently handle code reviews, deployment, feature creation, quality assurance, UX and design evaluation for Slerp (https://slerpit.com/). It's a platform for European SMEs who prefer on demand pickups and deliveries.

Tech Stack: Elixir Phoenix, React-Redux, Git, PostgreSQL, Semaphore CI, ExUnit, Enzyme, Jest. Deployed via Heroku.

Also handled projects built with Ruby on Rails and Ember.js. Handles first stage interviews and training for incoming Software Engineers.

### MCN Freedom! Technologies Inc., Philippines — *Software Engineer*

JULY 2015 - OCTOBER 2016

Part of the team that created an extremely fast remittance system that sends 1 to 3 Million USD to approximately 100,000 Youtube partners (within less than 30 minutes) every month. As part of the largest Youtube network in population, I developed an understanding of online media platforms, their business models, and how to leverage them for profit.

Tech Stack: ExpressJS, React Redux, Angular 1.x, Laravel, Python, MySQL.

Handled first stage interviews for incoming junior software engineers, and training for interns.

### Orange and Bronze Software Labs, Philippines — *Software Engineer* Intern

MAY 2014 - JUNE 2014

A software consultancy company. My responsibilities included designing git flow for intern teams, performing code reviews, and maintaining the company's' internal CRM system.

Tech Stack: HTML5, CSS3, javascript, Java, Spring, Hibernate, MySQL

Personal Projects:

### EEEE.js — *github.com/jekku/users*

A boilerplate with simple auth that combines JS framework technologies with J2EE principles. Complete with code hygiene tests and continuous integration. Recommended for programmers shifting from Java frameworks to Javascript stacks.

Tech Stack: Express JS, ES6, Babel, Mocha, Chai, MySQL

Open Source:

### Nightmare.js — *github.com/segmentio/nightmare*

High level browser automation tool from Segment. Contributed some extension code and fixes. Also answers to github issues when developers have problems with it on their selected platform.

Tech Stack: Javascript, Electron API, Mocha, Chai

## CURRENT WORK SKILLS

- Git
- Elixir Phoenix
- React-Redux
- Heroku
- Ruby on Rails

## WEB SKILLS

- HTML5, RSCSS
- Express JS
- MySQL, MongoDB

## COMMUNITIES

- Manila JS
- DevOps PH
- Pontus Cognito
- PHackers.io

## LANGUAGES

- English
- Filipino

## ADDRESS

Fajardo Corner San Diego, Sampaloc Manila, 659A

## COLLEGE

**University of the Philippines Los Baños**

BS Computer Science
2011 - 2015

*"Prescriptive Measure of Representational State Transfer Services"*
- Awareded for Best Thesis

Tech Stack: Ruby on Rails, Code Igniter, Express JS, J2EE Spring, JMeter Parallel

**Stripity Stripe** — *github.com/code-corps/stripity_stripe*

Elixir Wrapper for calling Stripe API functionalities. Currently working FOR FREE with Code-Corps to implement its v2.0 to accommodate new Stripe API functions, and extend some features made from 1.0.

Tech Stack: Elixir

**Regex Hub** — *github.com/lukehaas/RegexHub*

Simple cheatsheet collection of useful Regular Expression patterns in Javascript. https://projects.lukehaas.me/regexhub/

Tech Stack: React.js, Redux, Sass
